There are two registered borehole wells both 130m deep which together yield more than 3,000 litres per hour and a reinforced concrete water storage reservoir with a 500 m³ capacity.

The entire property is run with photovoltaic solar energy, which has recently been upgraded, however it would be possible to obtain standard electricity supply.

There is no access tracks to other properties through this land, making this a very private and quiet piece of paradise.

Would be ideal for someone who wants complete privacy or for a development/business opportunity.
